Description of the Event:

While shifting the shuttering plates, 3 workers were involved in lifting the shuttering plate. While putting one shuttering plate on the top of other, two workers on one side of the shuttering plate pulled it towards their side. Consequently the IP on the other side whose hand were placed down side of the plate (as shown in the picture) pinched his hands between the two shuttering plates.

His right hand ring finger's nail got dislodged from the nail bed.

He was given first aid in site's first aid room.

Immediate Action(s) Taken to Prevent Reoccurrence (If Any):

He was given first aid in the site first aid room.

Incident was investigated.

Supervisor was instructed to use manual handling aids to lift heavy materials.

Supervisor was instructed to use as many workers as possible if manual handling aid cannot be used in some location. 1 worker should lift only 20 kg of weight.
